NexaCore Expense Policy

Version 2.9 | Employee and Business Expense Controls

Owner: Finance Operations **Effective:** 01 Aug 2026 **Review:** 31 Jul 2027

1. Purpose, Scope and Expense Principles

This policy defines which business expenses NexaCore may reimburse, who approves them, what evidence is required, and how Finance records and audits employee spending. The values below are synthetic private-company data created for RAG evaluation.

1.1 Core rules

• Expenses must have a clear business purpose and must be incurred while performing an approved company activity.

• Employees should use corporate purchasing channels where a company account, purchase order or approved vendor process exists.

• Personal spending is reimbursable only where the expense is eligible and the employee follows the reimbursement workflow.

• Receipts are required for individual expenses above INR 1,000 and for all categories designated as controlled spend.

• An expense must not be split into multiple transactions to avoid an approval threshold.

1.2 Approval matrix

Expense value	Normal approver	Additional approval
≤ INR 10,000	Manager	None
INR 10,001–50,000	Manager	Function budget owner
INR 50,001–2,00,000	Function head	Finance review
> INR 2,00,000	Function head	CFO delegate + Finance
Sensitive / exceptional	Function owner	Finance regardless of value

1.3 Non-reimbursable baseline

Personal entertainment, fines and penalties, expenses without a business purpose, alcohol purchased for personal consumption, unauthorized upgrades and costs already reimbursed through another channel are not reimbursable.

2. Travel and Accommodation

2.1 Domestic travel limits

Category	Standard limit	Evidence	Exception owner
Economy airfare	Actuals	Invoice / ticket	Function head
Rail / bus	Actuals	Ticket	Manager
Domestic hotel	INR 6,500/night	Hotel invoice	Function head
Meals	INR 1,200/day	Receipt or approved per diem	Manager
Local transport	INR 1,500/day	Receipt / trip record	Manager
Airport transfer	INR 1,200/trip	Receipt	Manager

2.2 Booking rules

• Travel should normally be booked through the approved travel portal at least 3 business days before domestic travel and 7 business days before international travel.

• Economy class is the default for flights under 4 hours; business class requires an approved exception.

• Hotel selection should prioritize the approved corporate rate card where available.

• Employees should not book non-refundable travel before the required business approval is recorded.

2.3 International travel

International travel requires function-head approval and Finance review before booking. Visa fees, mandatory travel insurance and reasonable business communication costs may be reimbursed when directly related to approved travel.

3. Meals, Client Events and Hospitality

3.1 Employee meals

Scenario	Limit	Conditions
Regular business travel	INR 1,200/day	Travel > 50 km from base location
Team meal	INR 1,000/person	Manager-approved team event
Client meal	INR 3,500/person	Client/business purpose documented
Late-working meal	INR 500/person	Work after 21:00 with manager approval

3.2 Client hospitality

• The claim must identify the customer/partner, attendees, business purpose and date.

• Hospitality involving a public-sector representative requires Compliance review before reimbursement.

• Cash gifts are not reimbursable.

• Vendor meals during active procurement or vendor selection require Finance/Compliance review.

3.3 Alcohol

Alcohol purchased as part of a formally approved client event may be reimbursed only where permitted by company policy and local law, within the event budget. Personal alcohol purchases are not reimbursable.

3.4 Team events

Quarterly team-event budgets are capped at INR 2,500 per employee unless the function head approves a higher amount. Events should be planned within the approved team budget.

4. Software, Equipment and Professional Spend

4.1 Software and subscriptions

• Recurring software subscriptions must use the procurement/vendor process rather than personal cards where an approved corporate subscription exists.

• A personal subscription may be reimbursed only when a manager confirms the business requirement and Finance confirms no duplicate corporate license exists.

• Annual subscriptions above INR 25,000 require Finance review before purchase.

• Software containing customer or restricted company data must be reviewed by Security before purchase.

4.2 Equipment

Item	Employee purchase limit	Required approval
Keyboard / mouse	INR 5,000	Manager
Monitor	INR 25,000	Manager + IT
Ergonomic chair	INR 30,000	Manager + People Ops/IT
Mobile device	INR 35,000	Function head + IT
Other equipment	> INR 35,000	Procurement + Finance

4.3 Professional fees

Certification, conference and learning costs follow the HR learning-wallet policy. Finance may reject duplicate claims where the same expense is submitted under both Finance and People Operations.

5. Submission, Audit and Exceptions

5.1 Submission timelines

Control	Requirement
Claim submission	Within 30 calendar days of expense date
Missing receipt explanation	Within 5 business days of Finance request
Month-end cutoff	18th calendar day for current-month payroll reimbursement
Manager review	Within 3 business days
Finance review	Within 5 business days after complete submission
Appeal / correction	Within 15 calendar days of rejection

5.2 Audit controls

• Finance performs monthly sample-based reviews and targeted reviews for unusual spend patterns.

• Duplicate detection compares employee, merchant, date, amount and receipt reference.

• Claims with altered receipts, unsupported business purpose or threshold splitting may be escalated to Internal Audit.

• Repeated policy exceptions are analyzed quarterly for budget leakage or policy redesign.

5.3 Exceptions

Exceptions require a written reason, amount, approving authority and expiry. A one-time exception does not establish precedent for future claims.

6. FY26 Expense Metrics and Governance

6.1 FY26 internal snapshot

Metric	FY26 value
Total reimbursed employee claims	8,462
Gross reimbursed value	INR 18.7 crore
Average claim value	INR 2,210
Claims returned for correction	8.9%
Duplicate claims detected	126
Average Finance review time	3.2 business days
Claims submitted within 30 days	94.6%
Travel spend share	61.3%
Software/professional spend share	18.7%

6.2 Governance cadence

• Finance Operations reviews exception trends monthly.

• Budget owners review category spend versus forecast each month.

• Internal Audit performs periodic control testing.

• Policy thresholds are reviewed annually or earlier if inflation, tax, business model or control requirements change.
